

INITIATIVES OVERVIEW

IAG/Florida Pilot Program

Project Contacts: Orlando Torres*, PJ Wilkins*, Steve Andriuk, Marty Stone, Mark Muriello, Jim Crawford, Phil Miller

Project Overview: Utilize existing video along the I-95 Corridor to capture all in-state and out-of-state plates in an effort to determine the approximate number of shared customers/violators. The first phase of testing will be completed by the end of 2010.

Violation Enforcement Reciprocity

Project Contacts: David Joyner*, JR Fenske*, Buddy Croft, Keith Barrack, Steve Kern, Randy Brown, Ebony Pittman, Michael Catolico, Phil Miller, Tim Sheane, Michael Crowell, Anna Salvagin

Project Overview: Produce and promote model legislation and/or Memorandum of Understanding for interstate toll collection enforcement across state lines. This committee will also work in close coordination with the AAMVA committee to build a strong working relationship with individual state DMV Offices.

AAMVA/Electronic Vehicle Registration (EVR)

Project Contacts: Neil Gray, JR Fenske, Orlando Torres, Chris Garlick, Russell Trotter, David Kristick, Mark Mahoney, Randy Brown, Michael Harrell, Michael Catolico, Phil Miller, Charlie Diehl

Project Overview: Establish a working relationship with AAMVA geared toward the potential of creating EVR standards, as well as address issues surrounding license plate readability and reciprocity. Also addressing potential access to national DMV database.

Phase 2 - Business Rules Development

Project Contacts: Marty Stone*, Grady Rankin*, PJ Wilkins, Clayton Howe, Steve Andriuk, Orlando Torres, Stan Ciszewski, Phil Miller

Project Overview: Plan, develop and refine a set of standard business rules between members for capturing, reading and processing license plate images through a unified HUB. RFI released to bank, cellular & toll industry leaders in October 2009. RFP Expected for release in August 2010.

Federal Legislation/Education Program

Project Contacts: David Kristick*, David Machamer*, Neil Gray

Project Overview: Work with other organizations to educate and inform political entities on opportunities for tolling interoperability between states/agencies, as well as potential national opportunities for VMT, EVR, etc. utilizing current and future toll technology.

Other Opportunities: OmniAir, GPS/Cellular Tolling, and Banks

Project Contacts: John Breedlove*, Steve Andriuk*, Marty Stone, David Machamer, Corey Barrette, Megan Garner, Phil Miller

Project Overview: Research alternative opportunities for interoperable toll collection to include GPS/Satellite based tolling (potential test beginning 2010) and alternative license plate recognition (testing in 2010, potential read rate %99.97).
